

Parents/Guardians,

**Here are some helpful tips for the Remote Learning Academy:**

- If they don't already have one, it would be helpful if your child had a schedule for each day, so they know what time they must be on their Zoom meetings, and to know what assignments are due for that day/what you expect them to get done for that day.
- Your child may be done with their Remote Learning before others are. So, please pack worksheets, workbooks, or a book to read, as your child will have to sit quietly while the others are still working in the 8:00am-3:00pm timeframe.
- If you have not already, it would be beneficial to practice logging onto the different sites with your child and bookmarking the sites with saved passwords, so your child is able to log on themselves.
- In case your child has technical difficulties, make sure they have hard copies of their assignments (if possible) or non-computer assignments to work on as a backup.
- Please make sure your child has their laptop charger with them. Your child should also have headphones with them because it can be distracting for other children who are on their own meeting at the same time.
